	PROCESS VERBAUX (BERITA ACARA).....	iii
	MOTTO	iv
	DEDICATION	v
	ACKNOWLEDGMENT.....	vi
	ABSTRACT	viii
	TABLE OF CONTENT	x
	LIST OF TABLE	xi
	LIST OF FIGURE.....	xiv
	ABBREVIATIONS	xvi
I	INTRODUCTION	1
	1.1 Background and Problem Statement	1
	1.2 Problem	3
	1.3 The Objectives of the research	4
	1.4 Scope of the Study.....	4
II	LITERATURE REVIEW	6
	2.1 Introduction	6
	2.2 Binders	6
	2.3 Behavior of bitumen binder	7
	2.4 The reasons to modify bitumen binders	9
	2.5 The role of modifying bitumen in hot mix asphalt (HMA) mixtures.....	10
	2.6 History, use, and benefits of the present bitumen modifications.....	13

2.7	Temperature susceptibility and Penetration Index (PI).....	14
2.8	Dense Graded Asphaltic Concreate	15
2.9	Testing the performance of Hot-Mix Asphalt (HMA) Mixtures	16
2.10	Buton Natural Rock Asphalt - modifier use in the research	20
2.11	Summary of the literature review.....	23
III	RESEARCH DESIGN AND METHODOLODY	24
3.1	Introduction.....	24
3.2	Bitumen Characterization.....	27
3.3	Determination of Mixing Variables of Bitumen and BNRA.....	27
3.4	Producing and Tes BNRA-MB	29
3.5	Storage Stability Test.....	29
	3.5.1 Softening Point Test.....	30
	3.5.2 Specific Gravity Test	32
	3.5.3 Penetration Test.....	33
3.6	Evaluation of The Performance of The BNRA-MB Binder Usage in Dense Graded Asphaltic Concreate	36
	3.6.1Agregate Characterization.....	36
	3.6.1.1 Coarse and Fine Agregate	37
	3.6.1.2 Mineral Filler	37
	3.6.1.3 Gradation Limits of Combined Agregates	37
3.7	Dense Graded Asphaltic Concreate mixture	38
3.8	Hot Mix Asphalt (HMA) Mixture	38
3.9	Marshall Stability and Flow Test	39
3.10	Static Immersion Test.....	40
IV	RESULTS AND DISCUSSIONS	42
4.1	Introduction	42
4.2	Mixing Bitumen with BNRA	42

4.3	Penetration Test.....	43
4.4	Softening Point Test.....	44
4.5	Temperature Susceptibility / Penetration Index (PI).....	46
4.6	Storage Stability.....	46
4.7	Mix Design of DG-AC – Determination Of Optimum Bitumen Content.....	47
4.8	Marshall Test.....	48
4.9	Static Immersion Test.....	51
V	CONCLUSIONS AND RECOMMENDATIONS.....	53
5.1	Conclusions.....	53
5.2	Recommendations.....	53
	REFERENCES.....	54
	APPENDIX.....	57

LIST OF TABLE

Table No.	Content	Page
2.1	Gradation limits of combined aggregates for DG-AC	20
2.2	Chemical substance composition	22
2.3	Consistency of the bitumen of BNRA	22
2.4	Gradation and properties of BNRA.....	23
3.1	Gradation limits of combined aggregates for DG-AC	39
4.1	Results of the consistency test of base bitumen and BNRA-MB ..	43
4.2	Statistical analysis of penetration test results of BNRA-MB.....	44
4.3	Statistical analysis of softening point test results of BNRA-MB...	45
4.4	Statistical analysis of penetration index (PI).....	46
4.5	Results of storage stability test of BNRA-MB.....	47
4.6	The result of Marshall test	48
4.7	Statistical analysis of Marshall stability.....	49
4.8	Statistical analysis of Marshall Flow	49
4.9	Statistical analysis of Marshall stiffness	49

LIST OF FIGURE

Figure	Content	Page
1.1	Basic flexible pavement structure	2
1.2	Load distributions on flexible pavement.....	3
2.1	Bitumen-time temperature dependency	8
2.2	Viscoelastic behaviour of bitumen.....	9
2.3	Viscoelastic responses of an HMA under static load.....	11
2.4	Viscoelastic responses of an HMA under moving wheel load	12
2.5	Nomograph to determine penetration index (SP/pen).....	19
2.6	Buton island and the location of BNRA	21
2.7	BNRA in the depth 1 to 1.5 meter from the land surface	22
2.8	BNRA in bag (left) and coarse grains of BNRA (right)	23
3.1	Flowchart of Research Plan	26
3.2	Illustration of mixing BNRA and Bitumen.....	28
3.3	The specimens of storage stability	30
3.4	Softening point test in progress.....	31
3.5	Softening Point Test on sketch.....	32
3.6	The weight picnometer + asphalt in Specific gravity test.....	33
3.7	The specimens of penetration test.....	35
3.8	The bitumen penetration test apparatus.....	35
3.9	Marshall test set.....	40
3.10	Static immersion test BNRA-MB (before 48 hours).....	41
3.11	Static immersion test of base bitumen (before 48 hours).....	41
4.1	Student t distribution	43
4.2	Regression model of penetration test results of BNRA - MB.....	44
4.3	Regression model of softening point test result of BNRA - MB ...	45
4.4	Regression model of Penetration Index value.....	47
4.5	Regression model of Marshall stability of BNRA - MB	49
4.6	Regression model of Marshall flow of BNRA - MB	50

4.7	Regression model of Marshall stiffness of BNRA – MB	51
4.8	Static-immersion test of base bitumen (after 48 hours)	52
4.9	Static-immersion test of 15% BNRA - MB (after 48 hours)	52

ABBREVIATIONS

ASTM	American Society for Testing and Materials
°C	Celcius
dmm	decimillimeters
G	grams
HMA	Hot Mix Asphalt
Kg	kilograms
KPa	kilo pascal
mm	millimeter
PC	Portland Cement
PC-MB	Portland Cement-Modified Bitumen
PEN	Penetration
PI	Penetration Index
psi	Pound per square inch
R	Coefficient of correlation
R ² /R-square	Coefficient of determination
R&B	Ring and Ball
SG	Specific Gravity
SMA	Stone Mastic Asphalt
SNI	Standar Nasional Indonesia
SP	Softening Point
US	United State
VFB	Voids filled with bitumen
VIM	Voids in the compacted mix
VMA	Voids in Mineral Aggregate
µm	microns
σ	stress
