ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan antara dukungan sosial dengan resiliensi pada penerima manfaat Panti Pelayanan Sosial PGOT Mardi Utomo. Teknik Analisa data penelitian ini menggunakan korelasi *product moment*. Subjek dalam penelitian ini adalah penerima manfaat di Panti Pelayanan Sosial PGOT Mardi Utomo, berjumlah 56 orang.

Penelitian ini menggunakan metode kuantitatif. Teknik *sampling* penelitian ini menggunakan *sampling* jenuh. Alat pengumpulan data penelitian ini menggunakan dua skala likert, yaitu skala likert resiliensi dan skala likert dukungan sosial. Skala resiliensi berjumlah 42 aitem dengan indeks diskriminasi aitem bergerak antara 0.324 - 0.592 dan $\alpha = 0.876$. Skala dukungan sosial berjumlah 40 aitem dengan indeks diskriminasi aitem bergerak antara 0.313 - 0.736 dan $\alpha = 0.936$.

Hasil penelitian menunjukkan ada hubungan positif yang sangat signifikan antara dukungan sosial dengan resiliensi, dengan nilai korelasi (r_{xy}) 0.604 dan taraf signifikansi 0.000 ($p < 0,01$). Sumbangan efektif yang diberikan dukungan sosial terhadap resiliensi sebesar 36.5%.

Kata kunci: Dukungan Sosial dan Resiliensi

**RELATIONSHIP BETWEEN SOCIAL SUPPORT WITH RESILIENCE OF
BENEFICIARIES IN PGOT SOCIAL SERVICES (BEGGAR, BUM, PEOPLE
DERELICT) MARDI UTOMO**

ABSTRACT

This study aims to determine the relationship between social support with resilience to beneficiaries at PGOT Social Services Mardi Utomo. Technique Analysis of this research data using product moment correlation. Subjects in this study were beneficiaries at PGOT Social Services Mardi Utomo, totaling 56 people. This research uses quantitative method. Sampling technique of this research use saturated sampling.

This research data collection tool uses two Likert scales, namely Likert scale resilience and Likert scale of social support. Resilience scale is 42 items with index of discriminating aitem moving between 0.324 - 0.592 and $\alpha = 0.876$. The social support scale is 40 items with a moving arime discrimination index between 0.313 - 0.736 and $\alpha = 0.936$. The results showed that there was a very significant positive relationship with the correlation value (r_{xy}) 0.604 and the significance level of 0.000 ($p < 0.01$).

The results showed there was a very significant relationship between social support and resilience. The effective contribution of social support to resilience is 36.5%.
