## LIST OF TABLES

Number of Table	Description	Page
<b>2.1</b>	Traffic Volume .....	2
<b>2.2</b>	Suggested levels of reliability for various functional classification	11
<b>2.3</b>	Serviceability index .....	13
<b>2.4</b>	Drainage levels from the pavement structure .....	24
<b>2.5</b>	Permeability of graded aggregates .....	31
<b>2.6</b>	Gradation for asphalt treated permeable layer .....	31
<b>2.7</b>	Effect of percentage passing 200 mesh sieve on coefficient of permeability of dense graded aggregate, feet per day.....	31
<b>4.1</b>	Data of soil from Semarang – Purwodadi road .....	61
<b>4.2</b>	Resilient Modulus (MR) .....	62
<b>4.3</b>	Average Daily Traffic year 2016 .....	65
<b>4.4</b>	Number of equivalency (E) of axle load .....	65
<b>4.5</b>	Load configuration for 8,16 ton ESAL .....	66
<b>4.6</b>	Worksheet for calculating 8,16 ton (ESAL) applications .....	67
<b>4.7</b>	Suggested levels of reliability for various functional classification	70
<b>4.8</b>	Serviceability index .....	71
<b>4.9</b>	Drainage levels from the pavement structure.....	76
<b>4.10</b>	The quality of drainage based on humidity levels .....	76
<b>4.11</b>	SN required .....	93
<b>4.12</b>	Result of thicknesses .....	93

## LIST OF FIGURES

Number of Figure	Description	Page
<b>1.1</b>	Flexible Pavement Structure .....	2
<b>1.2</b>	Rigid Pavement Structure .....	2
<b>1.3</b>	Load distributions on flexible pavement .....	3
<b>1.4</b>	Load distributions on rigid pavement .....	3
<b>2.1</b>	Example plot of cumulative 8,16 ton ESAL traffic versus time ..	9
<b>2.2</b>	Chart to determine coefficient of surface layer .....	21
<b>2.3</b>	Chart above foundation layer coefficient $a_2$ .....	22
<b>2.4</b>	Chart above coefficient subgrade $a_3$ .....	23
<b>2.5</b>	Typical section for rigid or flexible pavement structure .....	25
<b>2.6</b>	Example of drainage layer in pavement structure .....	30
<b>3.1</b>	Flowchart of Research Design and Methodology .....	40
<b>3.2</b>	Design chart for flexible pavements based on using mean values for each input .....	43
<b>3.3</b>	Procedure for determining thicknesses of layers using a layered analysis approach .....	46
<b>3.4</b>	Chart for estimating composite modulus of subgrade reaction $K_w$ assuming a semi – infinite subgrade depth .....	48
<b>3.5</b>	Design chart for rigid pavement based on usiang mean values for each input variable (segmen 1) .....	50
<b>3.6</b>	Design chart for rigid pavement based on usiang mean values	

	for each input variable (segmen 2) .....	51
<b>3.7</b>	Design chart for flexible pavement .....	56
<b>3.8</b>	Graph of environmental serviceability loss versus time for swelling conditions considered .....	57
<b>3.9</b>	Remaining life estimate based on present seviciability value and pavement cross section .....	58
<b>3.10</b>	Remaining life estimate based on present serviceability value and pavement cross section .....	59
<b>3.11</b>	Remaining life estimate predicted pavement condition factor.....	60
<b>4.1</b>	Plot of cumulative 8.16 ton – ESAL traffic vs time .....	69
<b>4.2</b>	Chart to determine coefficient of surface layer .....	73
<b>4.3</b>	Chart above Foundation layer coefficient $a_2$ .....	74
<b>4.4</b>	Chart coefficient subgrade $a_3$ .....	75
<b>4.5</b>	Procedure for determining thickness of layers using a layered analysis approach .....	77
<b>4.6</b>	Design Chart SN3 for All Pavement Thickness .....	78
<b>4.7</b>	Design Chart SN3 for Flexible Pavement .....	80
<b>4.8</b>	Design Chart SN2 for Flexible Pavement.....	81
<b>4.9</b>	Design Chart SN1 for Flexible Pavement.....	82
<b>4.10</b>	Design Chart SN3 for All Pavement Thickness .....	83
<b>4.11</b>	Design Chart SN3 for Flexible Pavement.....	85
<b>4.12</b>	Design Chart SN2 for Flexible Pavement.....	86
<b>4.13</b>	Design Chart SN1 for Flexible Pavement.....	87
<b>4.14</b>	Design Chart SN3 for All Pavement Thickness .....	88
<b>4.15</b>	Design Chart SN3 for Flexible Pavement.....	90

<b>4.16</b>	Design Chart SN <sub>2</sub> for Flexible Pavement.....	91
<b>4.17</b>	Design Chart SN <sub>1</sub> for Flexible Pavement .....	92
<b>4.18</b>	Flexible pavement layers using subgrade CBR < 2% .....	94
<b>4.19</b>	Flexible pavement layers using subgrade CBR 2 – 3% .....	94
<b>4.20</b>	Flexible pavement layers using subgrade CBR > 3% .....	94
<b>4.21</b>	Graph of environmental serviceability loss versus time for swelling conditions considered .....	95
<b>4.22</b>	Design Chart SN <sub>Y</sub> .....	96
<b>4.23</b>	Design Chart SN <sub>O</sub> .....	97
<b>4.24</b>	Remaining life estimate based on present servicability value and pavement cross section .....	98
<b>4.25</b>	Remaining life factor as a function of remaining life of existing and overlaid pavement .....	99
<b>4.26</b>	Remaining life estimate predicted from pavement condition factor100	
<b>4.27</b>	Graph of environmental serviceability loss versus time for swelling conditions considered .....	101
<b>4.28</b>	Design Chart SN <sub>Y</sub> .....	102
<b>4.29</b>	Design Chart SN <sub>O</sub> .....	103
<b>4.30</b>	Remaining life factor as a function of remaining life of existing and overlaid pavement .....	104
<b>4.31</b>	Remaining life factor as a function of remaining life of existing and overlaid pavement .....	105
<b>4.32</b>	Remaining life estimate predicted from pavement condition factor106	
<b>4.33</b>	Graph of environmental serviceability loss versus time for swelling conditions considered.....	107

<b>4.34</b>	Design Chart $SN_Y$ .....	108
<b>4.35</b>	Design Chart $SN_O$ .....	109
<b>4.36</b>	Remaining life factor as a function of remaining life of existing and overlaid pavement .....	110
<b>4.37</b>	Remaining life factor as a function of remaining life of existing and overlaid pavement .....	111
<b>4.38</b>	Remaining life estimate predicted fr pavement condition factor	112
<b>4.39</b>	Chart for estimating composite modulus of subgrade reaction $K_{\omega}$ assuming a semi – infinite subgrade depth .....	116
<b>4.40</b>	Design Chart for Rigid Pavement ( Segmen 1) .....	117
<b>4.41</b>	Design Chart for Rigid Pavement ( Segmen 2 ) .....	118
<b>4.42</b>	Rigid pavement layers using subgrade CBR < 2 % .....	119
<b>4.43</b>	Rigid pavement layers using subgrade CBR 2 – 3 % .....	119
<b>4.44</b>	Rigid pavement layers using subgrade CBR > 3 % .....	119

## **LIST OF ABBREVIATION**

- C = Cohesi
- Ca = Drainage coefficient
- CBR = California bearing ratio
- Cd = Drainage coefficient
- GI = Group index
- Gs = Specific Gravity
- $G_r$  = Traffic growth
- $D_D$  = Directional distribution factor
- $D_L$  = Line distribution factor
- $E_c$  = Concrete elastic modulus
- LL = Liquid limit
- $\mu$  = Confidence interval
- $\sigma$  = Standard deviation
- $\phi$  = Direct shear
- J = Load transfer coefficient
- k (pci) = Increase the modulus of subgrade reaction
- PL = Plastic limit
- PI = Plasticity index
- R = Coefisien of correlation
- $R^2$  = Coefisien of determination

- SL = Shrinkage limit  
 S = Development potential  
 $S_0$  = Overall standard deviation  
 SN = Structural number  
 $M_R$  = Effective resilient modulus of roadbed material  
 VDF = Value damage factor  
 $W_{18}$  = Estimated future traffic for the performance period  
 Ww = Weight of water  
 Ws = Soil particle size  
 Wopt = Optimum water content  
 W = Water content  
 $\gamma_s$  = Weight volume of solid granules  
 $\gamma_w$  = Weight volume of water  
 $\gamma_d$  = Dry density  
 $\gamma_b$  = Wet  
 $\alpha_{1,2,3}$  = Layer coefficients representative of surface, base, and subbase courses respectively  
 $D_{1,2,3}$  = Actual thicknesses (in inches) of surface, base and subbase courses, respectively  
 $m_{1,2,3}$  = Drainage coefficients for base and subbase layers, respectively  
 $\Delta PSI_{Po - Pt}$  = Design serviceability loss

$\Delta$ PSISW = Graph of cumulative environmental serviceability loss versus time

## LIST OF EQUATION

<b>Eq.2.1.</b>	8,16 ton ESAL formula.....
10	
<b>Eq.2.2.</b>	Serviceability formula .....
14	.....
<b>Eq.3.3.</b>	Estimate the layer coefficient $a_2$ formula.....
	21
<b>Eq.3.4.</b>	$E_{BS}$ formula .....
43	
<b>Eq.4.1.</b>	formula.....
	55
<b>Eq.4.2.</b>	Traffic growth formula.....
56	
<b>Eq.4.3.</b>	Serviceability formula.....
59	
<b>Eq.4.4.</b>	Calculation results elastic modulus formula.....
62
