### CHAPTER 1 INTRODUCTION

1.1. Background.....	1
1.2. High Speed Railway Jakarta – Bandung .....	5
1.3. Problem Limitation.....	6
1.4. Objective of the Study .....	6
1.5. Scope of the Study .....	7

### CHAPTER 2 LITERATURE REVIEW

2.1 Introduction.....	8
2.2 High Speed Railway Track.....	8
2.2.1 Design Principles.....	9
2.2.2 Ballastless system in use .....	10

2.3	High Speed Railway Track Structure .....	12
2.3.1	Forst Protection Layer .....	13
2.3.2	Hydraulic Bound Layer .....	14
2.3.3	Slab Concrete C 30/37.....	15
2.3.4	Reinforcement concrete.....	15
2.3.5	Sleeper B355 Distance 650 Mm.....	16
2.3.6	Rail Fastening.....	17
2.3.7	Rail 60EI .....	18
2.4	High Speed Train .....	19
2.5	Structure Type of High Speed Railway .....	21
2.5.1	Standard Aerial Viaduct .....	22
2.5.2	Balance Cantilever .....	23
2.5.3	Half Through Girder.....	25
2.5.4	Bathub Beams .....	25
2.5.5	Truss .....	26
2.5.6	Elevated Slab.....	28
2.5.7	U-trough (Grade separation) .....	29
2.5.8	Box culvert .....	30
2.6	Box Girder Calculating Method .....	32
2.6.1	Working Stress Method.....	32
2.6.2	Limit State Method.....	33
2.7	The Sequences of Box Girder Calculation .....	33
2.7.1	Planning of Prestressed beams .....	33
2.7.2	Box Girder Loading .....	34
2.7.3	Prestress Cable Calculations .....	39
2.7.4	Tendon position.....	39
2.7.5	Calculation of loss of prestressing force .....	40
2.7.6	Reinforcement of Prestressed Beams .....	42
2.7.7	Elastomers .....	44
2.8	Summary.....	46

## CHAPTER 3 DESIGN AND METHODOLOGY

3.1	Introduction.....	46
3.2	Preliminary design .....	46
3.2.1	Limit State Method.....	48
3.2.2	Working Stress Method.....	48
3.3	Box Girder Dimension .....	49
3.4	Section Properties .....	49
3.5	Box Girder Loading.....	52
3.5.1	Self Weight Construction (MS) .....	52
3.5.2	Superimposed dead load (MA) .....	53
3.5.3	Live Load (LL).....	55
3.5.4	Wind Load (EW).....	55
3.5.5	Earthquake Load (EQ) .....	57
3.5.6	Residual Moments and shear force on a Beam .....	58
3.6	Prestress forces, Eccentricity, and Number of Tendon.....	59
3.6.1	Initial Conditions when transfer.....	59
3.6.2	End Conditions when service.....	61
3.7	Tendon position .....	62
3.8	Loss of Prestress.....	64
3.8.1	Anchorage Friction.....	64
3.8.2	Jack Friction .....	64
3.8.3	Elastic shortening .....	65
3.8.4	Anchoring.....	68
3.8.5	Loss of prestress due to Relaxation of Tendon .....	69
3.9	Stress that Occurs due to Prestress style.....	75
3.9.1	Initial condition when transfer.....	75
3.9.2	End condition when service .....	76
3.10	Stress on the box girder due to load.....	77
3.10.1	Stress due to Self Weight (MS) .....	77
3.10.2	Stress due to superimposed dead load (MA) .....	78
3.10.3	Stress due to shrinkage and creep (SR) .....	78

3.10.4	Stress due to prestress (PR) .....	82
3.10.5	Stress due to live load (LL).....	82
3.10.6	Stress due to wind load (EW) .....	83
3.10.7	Stress due to earthquake load (EQ).....	84
3.10.8	Stress due to Effect of Temperature (ET) .....	84
3.11	Control stress against combination of loading.....	86
3.11.1	Control stress againts of combination 1.....	86
3.11.2	Control stress againts of combination 2.....	86
3.11.3	Control stress againts of combination 3.....	86
3.11.4	Control stress againts of combination 4.....	86
3.11.5	Control stress againts of combination 5.....	86
3.12	Box Girder Deflection .....	86
3.12.1	Deflection in the initial state (transfer) .....	86
3.12.2	Deflection after loss of prestress.....	87
3.12.3	Box girder deflection due to load .....	88
3.13	Deflection control of Load Combinations .....	90
3.14	Ultimit review of box girder prestress .....	91
3.14.1	Capacity ultimate moment .....	91
3.14.2	The ultimate moment due to load .....	93
3.14.3	Control combination of moment ultimate .....	96
3.15	End Block Enlargemnet.....	96
3.15.1	Calculation of stirrups for bursting force.....	96
3.15.2	Number of stirrup used for bursting force .....	97
3.15.3	Overview of shear force.....	97
3.16	Reinforcement Box girder .....	98
3.17	Review of Slab Floor Bridge .....	99
3.17.1	Self weight .....	99
3.17.2	Superimposed dead load .....	99
3.17.3	Wind load .....	99
3.17.4	Effect of temperature .....	99
3.17.5	Ultimit moment on the slab of the bridge floor .....	99

3.17.6 Slab enlargement.....	99
3.17.7 Control deflection of slab .....	102

## **CHAPTER 4 DESIGN AND CALCULATION**

4.1 Introduction.....	107
4.2 Preliminary Design .....	107
4.2.1 Specification of box girder .....	107
4.2.2 Specification of concrete .....	108
4.2.3 Specification of steel .....	109
4.3 Dimension of Box Girder .....	109
4.4 Section Properties of Box Girder.....	110
4.5 Box Girder Loading.....	114
4.5.1 Self weight construction (MS) .....	114
4.5.2 Superimposed Dead Load (MA) .....	115
4.5.3 Live Load (LL).....	117
4.5.4 Wind Load (EW).....	119
4.5.5 Earthquake Load (EQ) .....	120
4.5.6 Resume moment and shear force and beam .....	122
4.6 Prestress forces,Eccentricity,and Number of Tendon .....	125
4.6.1 Initial conditions when transfer.....	125
4.6.2 End condition when service .....	126
4.7 Tendon position .....	127
4.8 Loss of Prestress.....	132
4.8.1 Anchorage friction.....	132
4.8.2 Jack friction .....	132
4.8.3 Elastic shortening .....	133
4.8.4 Anchoring.....	135
4.8.5 Loss of prestress due to relaxation of tendon.....	136
4.9 Stress that Occurs due to Prestress style.....	139
4.9.1 Initial condition when transfer .....	139
4.9.2 State after loss of prestress .....	140

4.10	Stress on the box girder due to load.....	140
4.10.1	Stress due to self weight (MS).....	140
4.10.2	Stress due to Superimposed Dead Load (MA) .....	141
4.10.3	Stress due to Shrinkage and Creep (SR).....	141
4.10.4	Stress due to Prestress (PR) .....	143
4.10.5	Stress due to Live Load (LL).....	143
4.10.6	Stress due to Wind Load (EW) .....	144
4.10.7	Stress due to Earthquake Load (EQ).....	144
4.10.8	Stress due to effect of temperature (ET).....	145
4.11	Control stress against combination of loading.....	146
4.11.1	Control stress against combination 1 .....	146
4.11.2	Control stress against combination 2 .....	147
4.11.3	Control stress against combination 3 .....	147
4.11.4	Control stress against combination 4 .....	147
4.11.5	Control stress against combination 5 .....	148
4.12	Box Girder Deflection .....	148
4.12.1	Deflection in the initial state (transfer) .....	148
4.12.2	Deflection after loss of prestress.....	149
4.12.3	Box girder deflection due to load .....	149
4.13	Control Deflection of Load Combinations .....	151
4.14	Ultimate review of box girder prestress .....	153
4.14.1	Capacity ultimate moment .....	153
4.14.2	The ultimate moment due to load.....	155
4.14.3	Control combination of moment ultimate .....	157
4.15	End Block Enlargement.....	158
4.15.1	Calculation of stirrups of bursting force .....	160
4.15.2	Number of stirrups for bursting force .....	162
4.15.3	Overview of shear force.....	162
4.16	Box Girder Enlargement.....	165
4.16.1	Edge wall plate.....	165
4.16.2	Bottom wall plate.....	166

4.16.3 Upper wall plate.....	167
4.17 Riview of Slab Floor Bridge.....	167
4.17.1 Self weight .....	168
4.17.2 Superimposed Dead Load.....	168
4.17.3 Wind Load .....	168
4.17.4 Effect of temperature .....	168
4.17.5 Ultimite moment on the slab of the bridge floor .....	169
4.17.6 Slab enlargement.....	169
4.17.7 Control deflection of slab .....	171

## **CHAPTER 5 CONCLUSIONS AND RECOMENDATIONS**

5.1 Conclution.....	174
5.2 Recommendation.....	176

<b>REFERENCE.....</b>	<b>xxix</b>
