PREFACE.....	iv
ABSTRACT	vi
CONTENTS.....	vii
LIST OF TABEL	xi
LIST OF GRAFIC	xii
LIST OF PICTURE	xiii
APPENDIX LIST	xiv
LIST OF ABBREVIATION.....	xv
CHAPTER I.....	1
1.1. Background.....	1
1.2. Problem of Research	4
1.3. Purpose of the Research	4
1.3.1. General Purpose	4
1.3.2. Specific Purpose	5
1.4. Research Originality	5
1.5. Benefit Of The Research.....	9
1.5.1. Scientific Benefit.....	9
1.5.2. Practical Benefit	9
CHAPTER II	10
REVIEW OF LITERATURE	10
2.1. Amount Of Sebum	10
2.1.1. Structure of the Pilosebaceous Gland.....	11

2.1.2. Distribution	14
2.1.3. Hormonal Control	15
2.1.4. Sebum Production	15
2.1.4.1. Composition Of Human Sebum	15
2.1.4.2. Function Of Sebum.....	15
2.2. Histology	16
2.2.1. Inside the Folliculopilosebaceous Unit.....	16
2.2.2. Physiology.....	17
2.3. Hormone Dihydrotestosteron.....	17
2.3.1. Hormones, enzymes, receptors, and the intracrine system.....	17
2.3.2. Androgen Metabolism Within the Skin.....	20
2.3.3. Estrogen In Acne	25
2.4. Other Factors That Effect Acne.....	26
2.5. Acne Therapy	31
2.6. Isoflavone	32
2.6.1. Mechanisms Action of Isoflavones	33
2.6.1.1. Mechanism of Isoflavone as Antioxidant.....	34
2.6.1.2. Mechanism of Isoflavones as Anti-Inflammatory Effects	36
2.7. Epidemiology	36
CHAPTER III	39
3.1. Theoretical Framework.....	39
3.2. Conceptual Framework.....	42
3.3. Hipotesis.....	42
CHAPTER IV.....	43
Research Metode	43
4.1. Type and Research Design	43
4.2. Population and Research Sample	44
4.2.1. Population	44
4.2.2. Research Sampel.....	45
4.3. Operational variables and definitions	46
4.3.1. Variables.....	46

4.3.2. Operational Definition	46
4.3.2.1. Independent Variable.....	46
4.3.2.2. Dependent Variabel	47
4.4. Research Tools and Materials	48
4.5. Research Metode	49
4.6. Sampling Technique	52
4.7. Data Analysis	52
4.8. Research Time and Place	53
4.8.1. Place of Research	53
4.8.2. Time of Research.....	53
CHAPTER V	54
RESULTS AND DISCUSSION	54
1.1. Research Results	54
1.1.1. The Amout of Sebum Analysis	54
1.1.2. The DHT Receptor Activity Analysis	58
1.1.3. The Histology of Sebacea Gland	62
1.2. DISCUSSION	66
CHAPTER VI	69
CONCLUSIONS	69
6.1. Conclusions	69
6.2. Suggestion	70
ATTACHMENT	71
REFERENCES	79

LIST OF TABEL

Table 2.1. Guidelines for the management of acne vulgaris.....	49
Table 5.1. Mean Differences in Amount of Sebum	87
Table 5.2. Analysis of Differences Amount of Sebum between Treatment Groups	89
Table 5.3. Mean Differences in DHT Receptor Activity	91
Table 5.4. Analysis of Differences in DHT Receptor Activity between Treatment Groups	93
Table 5.5. Mean Differences Histology of Sebacea Gland.....	95
Table 5.6. Analysis Differences of Histology Sebacea Gland between Treatment Groups	97

LIST OF GRAFIC

Grafic 5. 1. Mean Amount of Sebum.....	88
Grafic 5. 2. Mean DHT Receptor Activity.....	92
Grafic 5. 3. Mean Histology of Sebacea Gland	96

LIST OF PICTURE

Figure 2. 1. Acne pathogenesis	11
Figure 2.2. (A) Basic structure of a terminal pilosebaceous unit in anagen (growth phase). The hair penetrates deep into the scalp and the associated sebaceous gland is relatively small. (B) Structures of the different types of pilosebaceous units. The hair, sebaceous gland, and duct vary in size relative to each other.....	12
Figure 2.3. The follicular unit consists of the intraepidermal acroinfundibulum (A), the intradermal infrainfundibulum (B) that extends to the top end of the isthmus (C), and then continues as the pilar unit (D) containing the hair papilla and follicle. The sebaceous unit is composed of all the sebaceous glands that join the isthmus (C) at the sebofollicular junction (E). It is a 360° structure that wraps around the isthmus.	13
Figure 2.4. The basement membrane (shown as pink under the epidermis) wraps around the whole folliculopilosebaceous unit, like a vinyl glove. Anything above the pink layer, and anything within the vinyl glove equivalent, is considered “non-self” or “foreign” by the inflammatory guardians of the integrity of the inside “self” area	22
Figure 2.5. The intracrine system utilizes five onsite enzymes to produce the range of androgens needed in and around the folliculopilosebaceous unit and elsewhere in the body. Some may be made directly from cholesterol; others may utilize the androgen precursors in dairy products..	22
Figure 2.6 Despite the destructive inflammation applied to the sides of the upper portion of this pilar structure, just below the isthmus, there is little to no involvement of the eccrine ducts on the right—hiding effectively behind their periodic acid–Schiff positive (PAS+) protective wrap. Note that the sebaceous glands have been reduced to stumps..	23
Figure 2.7. Chemical Structures of Daidzein Metabolites.	24
Figure 2.8 Chemical Structures of major soy isoflavone aglycones..	25
Figure 2.9. Acne vulgaris in late adolescence around the globe.	28
Figure 3. 1 Theoretical Framework	73
Figure 3. 2 Conceptual Framework.....	74
Figure 4. 1 Research Metode	83

APPENDIX LIST

- 1.** Appendix 1 : Etical Clearance
- 2.** Appendix 2 : Bacteria identification
- 3.** Appendix 3 : Research sertification
- 4.** Appendix 4 : Research result
- 5.** Appendix 5 : Anatomic pathology laboratory RS Islam Sultan Agung
- 6.** Appendix 6 : Anatomic pathology laboratory UGM
- 7.** Appendix 7 : Statistical test results
- 8.** Appendix 8 : Research photos
- 9.** Appendix 9 : Research schedule

LIST OF ABBREVIATION

1. AV.....Acne Vulgaris
2. AR.....Androgen Receptor
3. 5a-R.....5 alfa reductase
4. 3B-HSD.....3 beta hydroxysteroid dehydrogenase
5. 17B-HSD.....17 beta hydroxysteroid dehydrogenase
6. BP.....Benzoil Peroxide
7. CRH.....Corticotropin Releasing Hormone
8. CFU.....Colony Forming Units
9. DNA.....Deoxyribonucleic Acid
10. DHTDihydrotestosteron
11. DHEA.....Dehydroepiandrosterone
12. DHEAS.....Dehydroepiandrosterone Sulfate
13. DALY.....Disability Adjusted Life Year
14. ERs.....Estrogen reseptor
15. eNOS.....Endothelial NO-synthase
16. ERE.....Estrogen response element
17. FPSU.....Folliculopilosebaceous
18. GDB.....Global Burden of Desease
19. HPA.....Hypothalamuspituitary-adrenal
20. HE.....Hematoxylin & Eosin
21. IHC.....Immunochemistry
22. IL-1.....Interleukin-1

23. IGF-1.....Insulin –like Growth Factor-1
24. NER.....Nucleot ide Excision Repair
25. O-DMA.....O-Desmethyngolensin
26. PAS.....Periodic acid Schiff
27. RNA.....Ribonucleic Acid
28. SHBG.....Sex hormone-binding globulin
29. SG.....Sebaceous Gland
30. SERMs.....Selective Estrogen Reseptor Medulators
31. TLR.....Toll like reseptor
32. TNF.....Tumor Necrosis Factor
33. Tfm.....Testicular feminization syndrome
34. UVR.....Ultraviolet Radiation
35. UFLC.....Ultra Fast Liquid Chromatography
