**HUBUNGAN SIKAP PERAWAT DENGAN PELAYANAN SYARIAH DI
RUMAH SAKT ISLAM SULTAN AGUNG SEMARANG**

56 halaman + 14 tabel + 2 gambar + 18 lampiran + xvi

Latar Belakang: Sikap merupakan perasaan negative atau positif dengan kondisi mental yang disiapkan, dipelajari, dan sudah diatur melalui pengalaman, dan dapat memberikan pengaruh pada respon seseorang terhadap individu, obyek, dan keadaan. Dengan tingkatan sikap yaitu Menerima (*Receiving*), Merespon (*Responding*), Menghargai (*Valuing*), Bertanggungjawab (*Responsible*). Tujuan penelitian ini untuk mengidentifikasi adakah hubungan antara sikap perawat dengan pelayanan syariah di RSISA Semarang.

Metode: Penelitian ini menggunakan metode Deskriptif Analitik dengan pendekatan *Cross-Sectional*. Pengumpulan data dilakukan dengan observasi, jumlah responden 96 perawat dengan teknik *simple randome sampling*. Data yang diperoleh diolah menggunakan uji *Spearman*.

Hasil: Hasil penelitian menunjukkan bahwa 64 responden (66,7%) yang menyatakan melakukan pelayanan syariah dengan baik, dan 2 responden (2,1%) cukup dalam melakukan pelayanan syariah. Sedangkan pada sikap perawat dengan kategori cukup terdapat 15 responden (15,6%) menyatakan melakukan pelayanan syariah dengan baik, 10 responden (10,4%) cukup dalam melakukan pelayanan syariah. Sikap perawat dengan kategori kurang terdapat 1 responden (1,2%) melakukan pelayanan syariah dengan baik, 4 responden (4,2%) melakukan pelayanan syariah dengan cukup.

Kesimpulan dan Saran: Terdapat hubungan yang signifikan antara sikap perawat dengan pelayanan syariah di RSISA Semarang dengan nilai *p value* 0,000 (*p value* <0,05 dan keeratan hubungan yaitu sedang (0,569) serta arah hubungannya positif. Berdasarkan hasil penelitian ini dapat memberikan masukan dalam upaya peningkatan pelayanan kesehatan di RS dan perawat untuk memperhatikan sikap dalam melakukan pelayanan syariah dibidang keperawatan.

**RELATIONSHIP OF NURSE ATTITUDES WITH SHARIA SERVICES AT
ISLAMIC SAKTAN AGUNG SEMARANG**

56 pages + 14 tables + 2 pictures + 18 attachments + xvi

Background: *Attitude is a negative or positive feeling with a mental condition that is prepared, studied, and arranged through experience, and can have an influence on one's response to individuals, objects, and circumstances. With the level of attitude that is Receiving, Responding, Valuing, Responsible. The purpose of this study is to identify whether there is a relationship between nurses' attitudes with sharia services at RSISA Semarang.*

Method: *This research uses descriptive analytic method with cross-sectional approach. Data collection was done by observation, the number of respondents was 96 nurses with simple random sampling technique. The data obtained were processed using the Spearman test.*

Results: *The results showed that 64 respondents (66.7%) stated that they performed sharia services well, and 2 respondents (2.1%) were sufficient in conducting sharia services. Whereas in nurses' attitudes with sufficient categories there were 15 respondents (15.6%) stated doing sharia services well, 10 respondents (10.4%) were sufficient in doing sharia services. The attitude of nurses with less categories there is 1 respondent (1.2%) doing sharia services well, 4 respondents (4.2%) doing sharia services adequately.*

Conclusions and Recommendations: *There is a significant relationship between nurses' attitudes with Islamic services at RSISA Semarang with a p value of 0,000 (p value <0.05 and a close relationship of moderate (0.569) and the direction of the positive relationship. Based on the results of this study can provide input in efforts to improve health services in hospitals and nurses to pay attention to attitudes in sharia services in the field of nursing.*

Keywords : *Nurses' attitudes, Sharia services*
