LEMBAR PENGESAHAN PENGUJI ........................................................................ iii
MOTTO DAN PERSEMBAHAN .............................................................................. iv
KATA PENGANTAR ................................................................................................. vi
DAFTAR ISI ............................................................................................................. viii
DAFTAR GAMBAR .................................................................................................. xi
DAFTAR TABEL ...................................................................................................... xiii
DAFTAR LAMPIRAN .............................................................................................. xiv
ABSTRAK ................................................................................................................ xv
BAB I PENDAHULUAN .......................................................................................... 1
  1.1 Latar Belakang .................................................................................................. 1
  1.2 Perumusan Masalah ........................................................................................ 2
  1.3 Batasan Masalah .............................................................................................. 3
  1.4 Tujuan Penelitian ........................................................................................... 3
  1.5 Manfaat Penelitian ......................................................................................... 3
  1.6 Sistematika Penulisan ..................................................................................... 3

BAB II LANDASAN TEORI .................................................................................... 5
  2.1 Tinjauan Pustaka ............................................................................................. 5
  2.2 Sistem Distribusi ............................................................................................ 6
  2.3 Peralatan Sistem Distribusi .......................................................................... 8
      2.3.1 Pemutus Tenaga (PMT) ......................................................................... 8
      2.3.2 Disconecting Switch / Sakelar Pemisah ................................................. 9
      2.3.3 Air Break Switch (ABSW) .................................................................... 10
      2.3.4 Load Break Switch (LBS) ..................................................................... 11
      2.3.5 Penutup Balik Otomatis (PBO) / Recloser ........................................... 12
      2.3.6 Sectionaliser (SSO) ............................................................................. 13

vii
2.4 Proteksi Sistem Distribusi ................................................................. 13
  2.4.1 Pola Pengaman Sistem Distribusi ............................................. 15
  2.4.2 Perangkat Sistem Proteksi ....................................................... 19
2.5 Penutup Balik Otomatis (PBO) ......................................................... 22
  2.5.1 Jenis-Jenis Reclosing Relay .................................................. 23
  2.5.2 Sifat-Sifat PBO ............................................................... 25
2.6 Ground Fault Relay (GFR) ............................................................. 25
  2.6.1 Karakteristik Rele .............................................................. 26
2.7 Beban Tidak Seimbang ................................................................. 28

BAB III METODOLOGI PENELITIAN .................................................. 32
  3.1 Lokasi Penelitian ........................................................................... 32
  3.2 Waktu Penelitian ......................................................................... 32
  3.3 Peralatan Yang Digunakan .......................................................... 33
  3.4 Metode Pengambilan Data ........................................................... 35
  3.5 Flow Chart ................................................................................... 37

BAB IV HASIL DAN ANALISA ............................................................... 38
  4.1 Data Setting Recloser S3-83/31 ...................................................... 38
  4.2 Pengukuran Beban Zone S3-83/31 ................................................. 39
  4.3 Analisa Ketidakseimbangan Beban Pada Penyulang SMU05........... 40
    4.3.1 Analisa Dengan Perhitungan Rumus Vektor & Rectangular .. 40
    4.3.2 Analisa Dengan Perhitungan Prosentase Ketidakseimbangan
        Beban .................................................................................. 42
  4.4 Penyeimbangan Beban Zone S3-83/31 .......................................... 45
  4.5 Analisa Hasil Penyeimbangan Beban Zone Recloser S3-83/31 ....... 46
    4.5.1 Analisa Hasil Penyeimbangan Dengan Rumus Vektor & Rectangular .................................................. 46
    4.5.2 Analisa Hasil Penyeimbangan Dengan Perhitungan Prosentase
        Ketidakseimbangan Beban ......................................................... 47
