Raja Ampat or 'Four Kings', is the name given to some islands in West Papua and comes from a local myth. The four major islands are Waigeo, Misool (which is home to ancient rock painting), Salawati, and Batanta. Raja Ampat is located in the bird head of the island of Papua. Underwater enthusiasts flock to this region because it offers the world's best marine sight. In the Raja Ampat islands, divers can explore vertical underwater walls. The thrill of drift diving is another great challenge.

The territory within the islands of the Four Kings is enormous, covering 9.8 million acres of land and sea, home to 540 types of corals, more than 1,000 types of coral fish and 700 types of mollusks. This makes it the most diverse living library for world's coral reef and underwater biota. According to a report developed by The Nature Conservancy and Conservation International, around 75% of the world's species live here.
