

## ABSTRAK

Amiruddin. (2020). Analisis Pola Asuh Orang Tua Terhadap Sikap Tanggung Jawab Siswa Kelas III Sekolah Dasar. *Skripsi*. Program Studi Pendidikan Guru Sekolah Dasar. Fakultas Keguruan dan Ilmu Pendidikan, Universitas Islam Sultan Agung. Pembimbing I : Yulina Ismiyanti, M.Pd., Pembimbing II : Muhamad Afandi, M.Pd.

Penelitian ini berfokus pada Pola Asuh Orang Tua Terhadap Sikap Tanggung Jawab Siswa Kelas III Sekolah Dasar. Pola asuh orang tua sangat berpengaruh terhadap sikap tanggung jawab siswa. Tujuan dari penelitian ini adalah untuk meningkatkan sikap tanggung jawab siswa pada kehidupan sehari-hari dan ketika siswa berada di lingkungan masyarakat. Penelitian ini merupakan Deskriptif Kualitatif. Teknik keabsahan data adalah konsep penting yang diperbaharui dari konsep kesahihan (*validitas*) dan keandalan (*reabilitas*) menurut versi “*positivisme*” dengan dilakukan beberapa cara *Credibility, Triangulasi teknik, Dependability, Confirmability*. Berdasarkan hasil penelitian Analisis Pola Asuh Orang Tua Terhadap Sikap Tanggung Jawab Siswa Kelas III Sekolah Dasar. Dari 6 siswa sebagai sampel didapatkan 1 siswa yang orang tuanya menerapkan pola asuh demokratis dengan sikap tanggung jawab yang didapati siswa 1 bertanggung jawab. 4 siswa yang orang tuanya menerapkan pola asuh permisine dengan sikap tanggung jawab yang di dapat siswa 2 cukup bertanggung jawab, siswa 3 tidak bertanggung jawab, siswa 5 memiliki sikap tanggung jawab yang baik, dan siswa 6 memiliki sikap cukup bertanggung jawab. 1 siswa yang orang tuanya menerapkan pola asuh otoriter dengan sikap tanggung jawab yang didapati siswa 4 bertanggung jawab.

**Kata Kunci** : Pola Asuh Orang Tua, Sikap Tanggung Jawab Siswa

## **ABSTRACT**

Amiruddin. (2020). Anaysis of Parenting Patterns on Resonibility Attitudes of Class III Elementary School Student, thesis elementary school teacher education study program Faculty of teachers and education, Sultan Agung Islamic University. Advisor I : Yulina Ismiyanti, M.Pd., advisor II : Muhamad Afandi, M.Pd.

This study focus on the Parenting Patterns on Resonibility Attitudes of Class III Elementary School Student. Parent's upbringing is very influential on the responsible attitude of students. The purpose of this research is to increase the responsible attitude of students in everyday life and when students are in the community. This research is descriptive qualitative. Data validity technique is an important concept which is renewed from the concept of validity (validity) and reliability (reliability) according to the "positivism" version by using several methods, namely credibility, technical triangulation, dependability, and confirmability. Based on the results of the study the Analysis of Parenting Patterns on the Responsibility Attitudes of Class III Elementary School Students. Of the 6 students in the sample, it was found that 1 student whose parents applied democratic parenting with an attitude of responsibility found that student 1 was responsible. 4 students whose parents apply permissive parenting with an attitude of responsibility that students 2 are quite responsible for, student 3 is not responsible, student 5 has a good attitude of responsibility, and student 6 has a fairly responsible attitude. 1 student whose parents apply authoritarian parenting with an attitude of responsibility that students get 4 responsibility.
