ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan antara dukungan sosial orang tua dengan komitmen karir pada siswa SMA dan SMK, serta untuk mengetahui perbedaan komitmen karir antara siswa SMA dan SMK. Variabel tergantung dalam penelitian ini adalah komitmen karir dan variabel bebas dukungan sosial orang tua. Penelitian ini menggunakan metode kuantitatif. Analisa dilakukan kepada 736 siswa SMA dan SMK yang ada di Kabupaten Demak. Metode pengambilan data dalam penelitian ini menggunakan skala *Career Maturity Inventory Form-C (CMI Form-C)* dan skala dukungan sosial. Skala *CMI Form-C* berjumlah 6 aitem dengan rentang daya beda 0,335-0,428 dan memiliki *internal consistency* sebesar 0,731. Skala dukungan sosial berjumlah 40 aitem dengan rentang daya beda 0,317-0,721 dan memiliki *internal consistency* 0,941. Analisa data dalam penelitian ini menggunakan teknik korelasi *Product Moment* dari Pearson dan metode komparasi dengan analisis data *One Way-Anova*. Berdasarkan hasil analisa *Product Moment* diperoleh nilai r_{xy} sebesar -0,066 dengan taraf signifikansi 0,036 ($p < 0,05$). Hasil penelitian menunjukkan ada hubungan yang tidak signifikan antara dukungan sosial orang tua dengan komitmen karir pada siswa SMA dan SMK. Hasil analisis statistik *One Way-Anova* menunjukkan $F=9,119$ dengan taraf signifikansi 0,003 ($p < 0,01$) dengan nilai rata-rata siswa SMA 19,344 lebih tinggi dibandingkan nilai rata-rata siswa SMK 17,672. Hasil ini menunjukkan bahwa terdapat perbedaan komitmen karir antara siswa SMA dan SMK.

Kata kunci : Komitmen karir, dukungan sosial.

THE CORRELATION BETWEEN SOCIAL SUPPORT OF PARENTS AND CAREER COMMITMENT IN SENIOR HIGH SCHOOL AND VOCATIONAL HIGH SCHOOL

ABSTRACT

This research aimed to determine the correlation between social support of parents and career commitment in senior high school and vocational high school, and determine the differences between students career commitment in senior high school and vocational high school. The dependent variable was career commitment and the independent variable was social support of parents. This research used quantitative method. The samples analysis were of 736 students of senior high school students and vocational high school in Demak Regency. The data collection of this study used to methods Career Maturity Inventory Form-C (CMI Form-C) and scale of social support. CMI Form-C amounted 6 items with item total correlation 0,335-0,428 and internal consistency equal to 0,731. The scale of social support amounted 40 items with item-total correlation 0,317-0,721 and internal consistency equal to 0,941. In this research the data analysis used Product Moment correlation technique of Pearson and One Way-Anova. Based on the results of Product Moment analysis obtained r_{xy} amount -0,066 with significance level $p=0,036$ ($p<0,05$). The result showed that there was no significant correlation between social support of parents and students career commitment in senior high school and vocational high school. The result of statistics of One Way-Anova was $F=9,119$ with significance 0,003 ($<0,01$) and average value of senior high school students 19,344 higher than the average value of vocational high school 17,672. The result showed that there was a different in career commitment between senior high school and vocational high school.

Keywords : *Career commitment, social support.*
