**HUBUNGAN SIKAP LANSIA DENGAN PEMANFAATAN POSYANDU DI
KELURAHAN GENUKSARI KECAMATAN GENUK KOTA SEMARANG**

45 halaman + 9 tabel + 2 gambar + 14 lampiran + xiv

Latar Belakang : Penilaian lansia terhadap pelayanan kesehatan sangat penting sebagai dasar mengikuti kegiatan posyandu, dengan cara menilai sikap lansia terhadap kegiatan dan manfaat yang didapatkan dari pelayanan posyandu. Tujuan penelitian untuk mengetahui hubungan sikap lansia dengan pemanfaatan posyandu.

Metode : Jenis penelitian deskriptif analitik. Pengambilan data dengan dokumentasi dari pihak berwenang dan menggunakan kuesioner. Jumlah responden 93 lansia dengan teknik *proportionate stratified random sampling*. Data diolah secara statistik dengan menggunakan rumus korelasi spearman.

Hasil : Berdasarkan hasil diperoleh bahwa 93 responden penelitian, sebagian besar berumur 60-74 tahun berjumlah 77 responden (82,8 %). Jenis kelamin sebagian besar perempuan berjumlah 62 responden (66,7 %). Tingkat pendidikan sebagian besar tidak sekolah berjumlah 41 responden (44,1 %). Semua responden mendapatkan informasi mengenai posyandu. Hasil penelitian juga menunjukkan bahwa responden memiliki sikap dalam kategori cukup berjumlah 66 responden (71,0 %). Responden rata-rata memanfaatkan posyandu sebanyak 4 kali dalam satu tahun terakhir. Dari hasil uji didapatkan nilai r sebesar 0,88 sedangkan r tabel bernilai 0,17, sehingga r hitung $>$ r tabel.

Simpulan : Ada hubungan sangat kuat dan arah positif antara sikap lansia dengan pemanfaatan posyandu di Kelurahan Genuksari Kecamatan Genuk Kota Semarang.

Kata Kunci : Sikap, Pemanfaatan posyandu, Lansia

RELATIONSHIP OF ELDERLY ATTITUDE WITH THE UTILIZATION OF POSYANDU IN KELURAHAN GENUKSARI KECAMATAN GENUK CITY OF SEMARANG

45 pages + 9 tables + 2 pictures + 14 appendices + xiv

Background : The assessment of the elderly towards health services is very important as a basis for participating in the posyandu activities, by assessing the attitudes of the elderly towards the activities and benefits obtained from the posyandu services. The aim of the study was to determine the relationship between the attitude of the elderly and the use of the posyandu.

Method : Type of analytic descriptive research. Retrieving data with documentation from the authorities and using a questionnaire. The number of respondents was 93 elderly with the proportionate stratified random sampling technique. Data was processed statistically using the Spearman correlation formula.

Results : Based on the results it was obtained that 93 study respondents, most of them aged 60-74 years were 77 respondents (82.8%). The sex of most women is 62 respondents (66.7%). The level of education of most non-school students is 41 respondents (44.1%). All respondents received information about the posyandu. The results of the study also showed that respondents had attitudes in the sufficient category totaling 66 respondents (71.0%). The average respondent used Posyandu 4 times in the past year. From the test results obtained r value of 0.88 while r table is 0.17, so $r_{count} > r_{table}$.

Conclusion : There is a very strong relationship and a positive direction between the attitude of the elderly and the use of posyandu in the Genuksari Village of the Genuk Sub-District, Semarang City.

Keywords : Attitude, Utilization of Posyandu, The elderly
