ABSTRACT

The research in this thesis is motivated by several constraints and benefits in the application of the Information Search method in Islamic Fiqh learning, including: students are less active in learning activities, lazy in doing assignments, lack of understanding in learning. This Information Search method can make it easier for students to learn, besides this method can also increase the activeness of students in learning Islamic Civilization History. The purpose of this study was to determine the implementation of the Information Search method in the fourth class of Islamic Civilization History subjects at MI Al-Hikmah Tembalang Semarang. With the formulation of the problem of How to Planning, Implementing and Evaluating the Information Search Method in Class IV Fiqh Subjects at MI Al-Hikmah Tembalang Semarang.

The method in this research uses a Qualitative-Descriptive approach, which is how to obtain data through direct research in the field which is carried out through observation, interviews and documentation which will later be used as data in the form of reports or descriptions.

It was concluded that the implementation of the Information Search method in online learning in the fourth grade Islamic Civilization History subject at MI Al-Hikmah Tembalang Semarang went well in accordance with the planning, implementation and evaluation stages.
