**FACTORS PREDICTOR PARENTS AS A RESULT OF ANXIETY LEVEL  
HOSPITALIZATION PRE SCHOOL CHILDREN IN THE CITY  
INPATIENT HOSPITAL SEMARANG**

**78 pages + 16 table + XIV**

**Background:** Parents can experience anxiety, especially when they feel their care in the hospital the first time and parents who lack the emotional and social support from family, relatives, even from health workers. Interview the researchers did on 6 parents of pre-school age children are treated in hospital acquired two of them do not feel anxious. while 4 of 6 parents express dismay and sadness when children should be cared for in hospital. The purpose of this study was to determine the factors parental anxiety level predictors of hospitalization due to pre-school age children in the inpatient hospital Semarang.

**Methods:** The study was a quantitative study was an observational study with the approach used in this study was a cross-sectional approach. The sample in this study was 70 elderly patients. The analysis used logistic regression.

**Results:** There wasn't influence between economic status with the anxiety of parents of pre-school age children who received treatment (p-value 0.561). There wasn't influence between experience with the anxiety of parents of pre-school age children who received treatment (p-value 1.000). There is a influence between knowledge and anxiety of parents of pre-school age children who received treatment (p-value 0.000). There is a influence between family support with the anxiety of parents of pre-school age children who received treatment (p-value 0.036). There is a influence between caring with the anxiety of parents of pre-school age children who received treatment (p-value 0.002). There is a influence between the states of anxiety of parents of children with pre-school age children who received treatment (p-value 0.038)

**Conclusions:** There are significant predictors of factors on the level of parental anxiety due to the hospitalization of pre-school age children in the inpatient hospital Semarang.
