“PENGETAHUAN WANITA USIA SUBUR TENTANG KONTRASEPSI
MANTAP (TUBEKTOMI) DI DESA GILING KECAMATAN PABELAN
KABUPATEN SEMARANG”

Xvii + 50 halaman + 5 tabel + 14 lampiran

Tubektomi adalah kreasi baru kontrasepsi mantap wanita. Tubektomi adalah tindakan oklusi atau pengambilan sebagian saluran telur wanita untuk mencegah proses fertilisasi. Angka keikutsertaan wanita untuk memakai kontrasepsi mantap masih rendah. Hal ini dikarenakan pengetahuan terhadap kontrasepsi mantap (tubektomi) masih kurang. Penelitian ini untuk mendeskripsikan pengetahuan tentang kontrasepsi mantap (tubektomi) di Desa Giling Kecamatan Pabelan Kabupaten Semarang.

Jenis penelitian ini yaitu survey deskriptif dengan rancangan cross sectional study. Jumlah populasi 278 wanita usia subur dengan pengambilan sampel 78 wanita usia subur secara proportional sampling. Analisis data menggunakan univariat.

Hasil penelitian menunjukkan pengetahuan tentang kontrasepsi mantap (tubektomi) baik sebanyak 21 responden (28,4%) dan kurang sebanyak 53 responden (71,6%).

Simpulan pengetahuan wanita usia subur tentang kontrasepsi mantap (tubektomi) di Desa Giling Kecamatan Pabelan Kabupaten Semarang memiliki pengetahuan kurang. Bidan diharapkan untuk lebih peduli kepada masyarakat dan bisa memberikan informasi dalam bentuk penyuluhan tentang kontrasepsi mantap (tubektomi).
