PENGETAHUAN BIDAN TENTANG PROGRAM EMAS
(*EXPANDING MATERNAL AND NEONATAL SURVIVAL*)
DI WILAYAH KERJA PUSKESMAS TLOGOSARI KULON
KOTA SEMARANG

xvii + 74 halaman + 18 tabel + 2 bagan + 10 lampiran

Angka kematian dari waktu ke waktu menggambarkan status kesehatan masyarakat secara kasar, kondisi atau tingkat permasalahan kesehatan, kondisi lingkungan fisik dan biologik secara tidak langsung. Angka tersebut dapat digunakan sebagai indikator dalam penilaian keberhasilan pelayanan kesehatan dan program pembangunan kesehatan. Angka kematian tersebut yaitu AKI dan AKB. Pada tahun 2012 Kementerian Kesehatan meluncurkan program *Expanding Maternal and Neonatal Survival* (EMAS) dalam rangka menurunkan angka kematian ibu dan neonatal sebesar 25%. Program EMAS (*Expanding Maternal and Neonatal Survival*) adalah sebuah program kerjasama Kementerian Kesehatan RI dan USAID selama lima tahun (2012-2016) dalam rangka mengurangi angka kematian ibu dan bayi baru lahir. Tujuan penelitian ini untuk mengetahui pengetahuan bidan tentang Program EMAS (*Expanding Maternal and Neonatal Survival*) di wilayah kerja Puskesmas Tlogosari Kulon Kota Semarang.

Jenis penelitian deskriptif dengan pendekatan *cross sectional* dengan menggunakan Tehnik total sampling dengan jumlah 31 responden.

Hasil penelitian diketahui bahwa pengetahuan bidan tentang Program EMAS di wilayah kerja Puskesmas Tlogosari Kulon Kota Semarang mempunyai pengetahuan baik yaitu sebanyak 25 responden (80,65%) dan mempunyai pengetahuan cukup sebanyak 6 responden (19,35%) dan tidak ditemukan responden yang mempunyai pengetahuan kurang.

Saran yang dianjurkan kepada bidan yang bekerja di Wilayah Kerja Puskesmas Tlogosari Kulon Kota Semarang diharapkan lebih meningkatkan pelayanan terutama dalam menangani AKI dan AKB serta perlu peningkatan sumber daya manusia melalui program pendidikan, pelatihan, seminar agar menjadi tenaga kesehatan yang berkualitas sesuai dengan perkembangan iptek
