ABSTRACT

RELATIONSHIP KNOW LEDGE OF TECHNIQUE BREASTFEEDING WITH BREASTFEEDING BEHAVIOR WOMEN WHO HAVE BABY 0-6 MONTH IN BPM ANA ARIYANI, WEDUNG DEMAK

xvii+ 57 page + 5 table + 3 draft +4 chart +12 attachment

Mother's Milk (ASI) is the best and most ideal food for babies. Exclusive breastfeeding is breastfeeding without supplementary feeding others at the age of 0-6 months. Some things that impede exclusive breast feeding them is the lack of knowledge about the mother and other family benefits as well as the correct way of breastfeeding, lactation counseling services and the lack of support from health workers, socio-cultural factors. it can be prevented through breastfeeding for 6 months after birth. The purpose of this study was to determine the relationship of maternal knowledge about breastfeeding techniques with breastfeeding behavior in BPM Ana Ariyani, Wedung Demak 2015.

This type of research is using observational analytic survey with across-sectional approach, the number of samples 35 respondents with total sampling technique sampling. Test the relationship between variables using Fisher's Exact test correlation.

The results showed that the majority of respondents in the category of good level of knowledge as much as 15 respondents (42.9%), quite as much as 16 respondents (45.7%) and bad 4 respondents (11.4 %), good breastfeeding behavior of 17 respondents (48, 6%) and bad 18 respondents (51.4%). From the statistical test p value=0.018 there is a significant correlation between the level of knowledge of behavior about breastfeeding techniques with breastfeeding behavior with p value<0.05.

Conclusion there is significant, significant between breastfeeding engineering knowledge with breastfeeding behavior. Mother advice breastfeeding is expected to increase knowledge about proper breastfeeding techniques exclusively and can increase exclusive breastfeeding.

Keywords: Knowledge, Behavior and Technique Breastfeeding.
