THE RELATIONSHIP BETWEEN PHBS KNOWLEDGE AND PHBS HOUSEHOLD STRUCTURE IN BANGETAYU WETAN VILLAGE SEMARANG

50 pages + 5 table+ xv

Background: The knowledge of clean and healthy living behaviour in the household structure is very important to help create a clean environment and can improve the result of healthy survey. From the results of observational data obtained in wetan Bangetayu vdistrict in 2011 for the scope of domestic PHBs structure which were still far from the national target. Those data were 8.6% for the prenatal careness; 11.1% for the exclusive Asi data ; and 38.7% for the childbirth data which helped by by the healthy services. The purpose of this study was to ensure the relationship between the knowledge of PHBs and PHBs household structure in Semarang Wetan Bangetayu district.

Method: The method used on this study was an observational analytic by using Cross Sectional approach . The data was collected by using questionnaire. The number of respondents was 45 housewives who lived in the Bangetayu Wetan Semarang district.The data obtained was processed statistically by using the chi square formula with the Gamma correlation test.

Results: Based on the results of the analysis obtained from the 45 respondents of this study found that most of the results were based on the characteristics from age 40-49 years old was 51.1%,.The respondents data who graduated in junior high school level, the precentage was 48.9%. Based on the housewives (IRT) level, the data was 80, 0%. The respondent data who got income less than 200,000/ month was53.3%. The results of this study also showed us that from the 45 respondents, there were 64,4% respondents who had a good level of knowledge and there were 35,6% respondents got good enough level of knowledge. Meanwhile the result of good PHBS structure behavior was 60.0%, and the result of good enough PHBs structure behavior of tthe households was 40.0%.

Conclusion: There is a significant relationship between the knowledge of PHBs and the PHBs households structure in Bangetayu Wetan Semarang district with the very strong closeness of the relationship.

Keywords: Knowledge of behavior, PHBS household structure.
