Pengisian poin A sampai dengan poin G mengikuti template berikut dan tidak dibatasi jumlah kata atau halaman namun disarankan seringkas mungkin. Dilarang menghapus/memodifikasi template ataupun menghapus penjelasan di setiap poin.

A. HASIL PELAKSANAAN PENELITIAN

Tuliskan secara ringkas hasil pelaksanaan penelitian yang telah dicapai sesuai tahun pelaksanaan penelitian. Penyajian meliputi data, hasil analisis, dan capaian luaran (wajib dan atau tambahan). Seluruh hasil atau capaian yang dilaporkan harus berkaitan dengan tahapan pelaksanaan penelitian sebagaimana direncanakan pada proposal. Penyajian data dapat berupa gambar, tabel, grafik, dan sejenisnya, serta analisis didukung dengan sumber pustaka primer yang relevan dan terkini.

Tahapan penelitian ini terdiri atas identifikasi, skrening, penilaian eligibilitas dan analisis sintesis kualitatif. Saat ini masih pada pelaksanaan tahap skrening.

Pada tahap identifikasi dari 2 search engine yaitu cochrane dan pubmed didapatkan data berikut:

The screenshot shows the Cochrane Library's advanced search interface at <https://www.cochranelibrary.com/advanced-search>. The search query consists of five terms connected by logical operators: "traditional medicine", "herbal medicine", "chronic kidney insufficiencies", "chronic kidney insufficiency", and "renal anemia". The search results are for trials from January 2017 to November 2021. At the bottom, there are buttons for "Search limits", "Send to search manager", and "Run search". A note at the bottom indicates that word variations have been searched.
