	PROCESS VERBAUX (BERITA ACARA)	iii
	MOTTO	iv
	DEDICATION	v
	ACKNOWLEDGMENT	vi
	ABSTRACT	viii
	TABLE OF CONTENT	x
	LIST OF TABLE	xiv
	LIST OF FIGURE	xv
	ABBREVIATIONS	xvi
I	INTRODUCTION.....	1
	1.1 Background and Problem Statement	1
	1.2 The Objective of the Research.....	4
	1.3 Scope of the Study	4
II	LITERATURE REVIEW	6
	2.1 Introduction	6
	2.2 Binders.....	6
	2.3 Behavior of bitumen binder	7
	2.4 The reasons to modify bitumen binders	10
	2.5 The role of modifying bitumen in hot mix asphalt (HMA) mixtures	11
	2.6 History, use, and benefits of the present bitumen modifications	14
	2.7 Temperature susceptibility	15
	2.7.1 Penetration Index (PI).....	15
	2.8 Stone Mastic Asphalt.....	17
	2.9 Testing the performance of Hot-Mix Asphalt (HMA)	

	mixtures	19
	2.9.1 Moisture Susceptibility Tests	20
2.10	Buton Natural Rock Asphalt (BNRA)-modifier use in the research.....	21
2.11	Summary of the literature review	25
III	RESEARCH DESIGN AND METHODOLOGY	27
3.1	Introduction	27
3.2	Bitumen Characterization	29
3.3	Optimum Bitumen Content	31
3.4	Determination of Mixing Variables of Bitumen and (Buton Natural Rock Asphalt).....	31
3.5	Preparation of Materials	32
3.6	Material Test.....	33
	3.6.1 Softening Point Test	33
	3.6.2 Specific Gravity Test.....	35
	3.6.3 Penetration Test	36
3.7	Determination of PI Content.....	38
3.8	Aggregate Characterization	38
3.9	Materials Test	38
	3.9.1 Coarse and Fine Aggregate.....	38
	3.9.2 Gradation Limits of Combined Aggregate	39
3.10	Hot Mix Asphalt (HMA) mixtures	40
	3.10.1 Stone Mastic Asphalt (SMA) 14-mixtures	40
3.11	Marshall Stability and Flow Test	41
IV	RESULTS AND DISCUSSIONS	42
4.1	Introduction	42
4.2	Bitumen Characterization	42
4.3	Mixing Bitumen with BNRA	43
4.4	Penetration Test	44
4.5	Softening Point Test	46
4.6	Penetration Index (PI).....	47
4.7	Using 25% BNRA-Asphalt mixtures as binder of Stone Mastic Asphalt (SMA)	48

4.8 Mix design of SMA-14 determination of optimum bitumen content	49
4.9 Marshall Stability Testing	50
V CONCLUSIONS AND RECOMMENDATIONS	51
5.1 Conclusions	51
5.2 Recommendations	51

LIST OF TABLE

Table No.	Content	Page
2.1	Gradation limits of combined aggregates for SMA.....	19
2.2	Chemical substance composition of BNRA (Source: BAI Co. Ltd)	22
2.3	Consistency of the bitumen of BNRA (Source: BAI Co. Ltd)	23
2.4	Gradation and Properties of Buton-NRA (Source: BAI Co. Ltd)	23
3.1	Gradation limits of aggregates for Stone Mastic Asphalt 14 (SMA-14)	39
4.1	Base bitumen properties	42
4.2	The results of consistency test of BNRA.....	43
4.3	Statistical analysis of penetration test results of BNRA-MB	45
4.4	Statistical analysis of softening point test results of BNRA-MB ...	46
4.5	Statistical analysis of penetration index (PI) results of BNRA-MB	48
4.6	Specific Gravity and Marshall Stability	50

LIST OF FIGURE

Figure	Content	Page
a.	Basic flexible pavement structure.....	2
b.	Load distributions on flexible pavement	3
2.5	Bitumen-time temperature dependency.....	8
2.2	Viscoelastic behaviour of	9
2.3	Viscoelastic responses of an HMA under static load	12
2.4	Viscoelastic responses of an HMA under moving wheel load	12
2.5	Nomograph to determine penetration index (SP/pen)	16
2.6	Cross-sectional view of a typical SMA and a dense-graded HMA	18
2.7	Buton island and the location of BNRA.....	21
2.8	Rock asphalt in the depth 1 to 1.5 meter from the land surface	22
2.9	Buton-NRA in bag (left) and coarse grains of Buton-NRA (right)	24
3.1	Flowchart of Research Plan Part 1	28
3.2	Flowchart of Research Plan Part 2	30
3.3	Fine particle of BNRA.....	31
3.4	Illustration of blending BNRA and Bitumen.....	32
3.5	Softening Point Test	34
3.6	Specific Gravity Test.....	36
3.7	Apparatus for The Bitumen Penetration Test	37
3.8	Marshall Test Set.....	41
4.1	Student t distribution	44
4.2	Regression model of penetration test results of BNRA.....	45
4.3	Regression model for softening point test result.....	47
4.4	Regression model of PI value of BNRA-Bitumen mixtures	48
4.5	Marshall test results to determine optimum bitumen content.....	50

ABBREVIATIONS

ASTM	American Society for Testing and Materials
°C	Celcius
dmm	decimillimeters
G	grams
HMA	Hot Mix Asphalt
Kg	kilograms
KPa	kilo pascal
mm	millimeter
BNRA	Buton Natural Rock Asphalt
BNRA-MB	BNRA-Modified Bitumen
PEN	Penetration
PI	Penetration Index
psi	Pound per square inch
R	Coefficient of correlation
R ² /R-square	Coefficient of determination
R&B	Ring and Ball
SG	Specific Gravity
SMA	Stone Mastic Asphalt
SNI	Standar Nasional Indonesia
SP	Softening Point
US	United State
VFB	Voids filled with bitumen
VIM	Voids in the compacted mix
VMA	Voids in Mineral Aggregate
µm	microns
