

Daftar Pustaka

- Deshpande, M. (1984.). *Electrical Power System Design*. New Delhi: Tata McGraw-Hill Publishing Company Limited.
- Arismunandar, A dan Kuswahara, S. "*Buku Pegangan Teknik Tenaga Listrik Jilid II : Saluran Transmisi*", cetakan kelima, Pradnya Paramita, Jakarta, 1982.
- Gonen, Turan. "*Electric Power Transmission System Engineering : Analysis & Design*". John Wiley and Sons, Inc. Toronto. 1988.
- Sumarsono, Heru. "*Analisis Perhitungan Jarak Antar Kawat dan Clearance Saluran Transmisi Udara*". Tugas Akhir Jurusan Teknik Elektro Universitas Diponegoro Semarang, 2009.
- Craig B. Smith. "*Energy Management Principles*", Application Benefits Savings California, 1981
- Keith Calais, "*Electrical design*", Ampacity, 2008
- Tobing, Bonggas L. "*Peralatan Tegangan Tinggi*", PT Gramedia Pustaka Utama. Jakarta. 2003.
- Institute of Electrical and Electronic Engineer (IEEE)* nomor katalog 96 TP 110-0 "*Glossary of Term and Definitions Concerning Electric Power Transmission System Access and Wheeling*".
- North American Electric Reliability Corporation (NERC). *Glossary of Term*, 2005.
- CTC Global. "*Engineering Transmission Lines with High Capacity Low Sag ACCC Conductors*". edisi pertama 2010.
- Edi Sastra, "*Development of Conductor Technology for Power Transmission*". KMI Wire and Cable. 2016.
- Walter C. Johnsons, Mc. Graw-Hill. "*Transmission Line and Network*". 1963.
