ABSTRAK

Penelitian ini bertujuan untuk mengetahui persepsi terhadap perilaku tindak kriminal ditinjau dari kepribadian *The Big Five* & status hukum wanita narapidana & wanita non narapidana. Penelitian ini menggunakan metode kuantitatif komparatif. Subjek penelitian adalah wanita narapidana di Lembaga Pemasyarakatan Klas II.A Wanita Semarang, dan wanita non narapidana di daerah Kaligawe Kota Semarang. Sampel penelitian berjumlah 50 wanita narapidana dan 50 wanita non narapidana. Metode pengambilan sampel menggunakan *quota sampling* untuk subjek wanita narapidana dan *accidental sampling* untuk wanita non narapidana. Metode pengumpulan data dalam penelitian ini menggunakan 2 skala, skala persepsi terhadap perilaku tindak kriminal dan skala kepribadian *The Big Five*. Pengolahan data menggunakan statistik parametrik dengan uji hipotesis menggunakan *Analisis varian dua jalur*. Hasil penelitian menunjukkan bahwa tidak ada perbedaan persepsi terhadap perilaku tindak kriminal ditinjau dari kepribadian *The Big Five* & status hukum wanita narapidana dan wanita non narapidana. Kelompok (wanita narapidana & wanita non narapidana) menghasilkan nilai $F = 1,663$ dengan taraf signifikan $= 0,200$ ($p > 0,05$), hasil tersebut menunjukkan bahwa tidak ada perbedaan persepsi terhadap perilaku tindak kriminal baik pada wanita narapidana maupun wanita non narapidana. Kepribadian *The Big Five* menghasilkan nilai $F = 0,171$ dengan taraf signifikan $0,843$ ($p > 0,05$), hasil tersebut menunjukkan bahwa tidak ada perbedaan persepsi terhadap perilaku tindak kriminal ditinjau dari kepribadian *The Big Five*. Kelompok dan kepribadian *The Big Five* menghasilkan nilai $F = 0,232$ dengan taraf signifikan $0,631$ ($p > 0,05$), hasil tersebut menunjukkan bahwa tidak ada perbedaan persepsi antara kelompok (wanita narapidana & wanita non narapidana) dan kepribadian (*Agreeableness*, *Conscientiousness*, dan *Neuroticism*) terhadap perilaku tindak kriminal.

Kata kunci: persepsi terhadap perilaku tindak kriminal, kepribadian *The Big Five*.

**THE PERCEPTION TOWARD CRIMINAL BEHAVIOUR IN TERM OF THE
BIG FIVE PERSONALITY AND LAW STATUS ON WOMEN PRISONERS
AND NON PRISONERS**

ABSTRACT

The purpose of this study to know the perception toward criminal behaviour in term of The Big Five personality and law status on women prisoners and non prisoners. This study using quantitative and comparative method. The subject of this study is women prisoners in women prisons class II.A of Semarang, and non prisoners in Kaligawe, Semarang. The sample of this study is 50 women prisoners and 50 non prisoners using quota sampling and accidental sampling. Collecting method in this study using 2 scales, perception toward criminal behavior scale and The Big Five personality scale. The processing data using statistical parametric with hypothesis test using variance analysis of two lanes. The result of this study shows that there is no differences in perception toward criminal behaviour in term of The Big Five personality and law status on women prisoners and non prisoners. The subject group (women prisoners and non prisoners) results percentage $F = 1,663$ with significant standard $= 0,200$ ($p > 0,05$), this result shows that there is no differences in perception toward criminal behaviour either in women prisoners or non prisoners. The Big Five personality results percentage $F = 0,171$ with significant standard $0,843$ ($p > 0,05$), this result shows that there is no differences in perception toward criminal behaviour in term of The Big Five personality. The group of The Big Five personality produces percentage $F = 0,232$ with significant standard $0,631$ ($p > 0,05$), this result shows that there is no differences in perception between (women prisoners and non prisoners) group and personality (Agreeableness, Conscientiousness, and Neuroticism) toward criminal behaviour.

Keywords: the perception toward criminal behaviour, The Big Five personality.
