**Hubungan Pengetahuan Dengan Tingkat Keterampilan Perawat Melakukan
Resusitasi Jantung Paru (RJP) Di RSI Sultan Agung Semarang Dan RSUD
Tugu Rejo Semarang**

53 halaman + 5 tabel + 15 gambar + xv

Latar Belakang : Resusitasi jantung paru adalah tindakan mengembalikan fungsi jantung dan paru. Penelitian ini bertujuan untuk mengetahui hubungan pengetahuan dengan tingkat keterampilan perawat melakukan resusitasi jantung paru yang dilakukan di RSI Sultan Agung Semarang Dan RSUD Tugu Rejo Semarang.

Metode : Metode yang digunakan dalam penelitian ini yaitu kuantitatif dengan jenis rancangan *descriptive correlation*. Teknik pengambilan sample dalam penelitian ini menggunakan teknik total sampling dan sampelnya sebanyak 45 responden.

Hasil : Hasil penelitian menunjukkan bahwa pengetahuan RJP yang dilakukan perawat berpengetahuan baik sebanyak 28 responden (62.2%) dan berpengetahuan kurang sebanyak 4 Responden (8.9%). Tingkat keterampilan dikategorikan baik sebanyak 30 responden (66.7%) dan tingkat keterampilan rendah sebanyak 4 responden (8.9%), uji statistik menggunakan uji spearman di dapatkan nilai p - value= 0.0001 dan nilai r = 0.849.

Kesimpulan : Ada hubungan pengetahuan dengan tingkat keterampilan perawat melakukan resusitasi jantung paru di RSI Sultan Agung Semarang dan RSUD Tugu Rejo Semarang.

Kata Kunci : Pengetahuan, Tingkat keterampilan, Resusitasi Jantung Paru.
