DAFTAR ISI .............................................................................................................. viii
DAFTAR SINGKATAN .............................................................................................. x
DAFTAR TABEL ......................................................................................................... xi
DAFTAR GAMBAR .................................................................................................... xiii
DAFTAR LAMPIRAN ................................................................................................ xiii
INTISARI .................................................................................................................. xiv

BAB I PENDAHULUAN ....................................................................................... 1
  1.1. Latar Belakang ................................................................................................. 1
  1.2. Rumusan Masalah .......................................................................................... 3
  1.3. Tujuan Penelitian .......................................................................................... 3
  1.3.1. Tujuan Umum ............................................................................................ 3
  1.3.2. Tujuan Khusus .......................................................................................... 3
  1.4. Manfaat Penelitian ....................................................................................... 4
  1.4.1. Manfaat Teoritis ....................................................................................... 4
  1.4.2. Manfaat Praktis ....................................................................................... 4

BAB II TINJAUAN PUSTAKA ........................................................................... 5
  2.1. Limfosit ......................................................................................................... 5
  2.1.1. Klasifikasi Limfosit ................................................................................. 7
2.1.2. Proses Diferensiasi Limfosit Naif ........................................7
2.1.3. Faktor yang Mempengaruhi Jumlah Limfosit ....................11
2.2. Kurma .............................................................................. 12
  2.2.1. Definisi ........................................................................12
  2.2.2. Taksonomi Kurma .................................................. 12
  2.2.3. Morfologi ................................................................. 12
  2.2.4. Manfaat dan Kandungan Kurma .............................. 13
  2.2.5. Kurma Ajwa .............................................................. 17
  2.2.6. Nabidz ..................................................................... 18
  2.2.7. Hubungan antara jus nabidz kurma ajwa dengan perubahan jumlah limfosit ........................................ 20
2.3. Tikus Wistar ..................................................................... 23
2.4. Infeksi Tifoid .................................................................... 24
  2.4.1. Salmonella typhi ...................................................... 24
  2.4.2. Efek Salmonella typhi pada Limfosit ....................... 28
2.5. Siprofloksasrin .................................................................. 31
2.6. Kerangka Teori .............................................................. 32
2.7. Kerangka Konsep ............................................................ 34
2.8. Hipotesis .......................................................................... 34

BAB III METODE PENELITIAN .................................................. 35
  3.1. Jenis Penelitian dan Rancangan Penelitian ................. 35
  3.2. Variabel dan Definisi Operasional ............................... 35
    3.2.1. Variabel .................................................................. 35
    3.2.2. Definisi Operasional ............................................. 36
3.3. Populasi dan Sampel ................................................................. 37
   3.3.1. Populasi .............................................................................. 37
   3.3.2. Sampel ............................................................................... 37
3.4.1. Kriteria Inklusi .................................................................... 38
   3.4.2. Kriteria Drop Out ............................................................... 38
3.5. Instrumen dan Bahan Penelitian ............................................. 38
3.6. Cara Penelitian ...................................................................... 39
   3.6.1. Persiapan Penelitian ......................................................... 39
   3.6.2. Pelaksanaan Penelitian ..................................................... 42
   3.6.3. Pengambilan Darah Tikus .................................................. 44
   3.6.4. Pengukuran Jumlah Limfosit ............................................. 44
3.7. Tempat dan Waktu .............................................................. 45
   3.7.1. Tempat .............................................................................. 45
   3.7.2. Waktu ............................................................................... 45
3.8. Analisis Hasil ...................................................................... 45
3.9. Alur Penelitian .................................................................. 47
BAB IV HASIL PENELITIAN DAN PEMBAHASAN ....................... 48
   4.1. Hasil Penelitian ............................................................... 48
   4.2. Pembahasan ................................................................. 51
BAB V KESIMPULAN DAN SARAN .......................................... 54
   5.1. Kesimpulan ................................................................. 54
   5.2. Saran ............................................................................. 54
