DAFTAR GRAFIK............................................................... xii
DAFTAR SINGKATAN ....................................................... xiii
DAFTAR LAMPIRAN......................................................... xiv
INTISARI........................................................................... xv

BAB I PENDAHULUAN......................................................... 1
  1.1. Latar Belakang ....................................................... 1
  1.2. Rumusan Masalah ................................................ 3
  1.3. Tujuan Penelitian .................................................. 4
    1.3.1. Tujuan Umum .................................................. 4
    1.3.2. Tujuan Khusus ................................................. 4
  1.4. Manfaat Penelitian ............................................... 5
    1.4.1. Manfaat teoritis ............................................... 5
    1.4.2. Manfaat praktis ............................................... 5
BAB II  TINJAUAN PUSTAKA .................................................................................. 6

2.1. Neutrofil ........................................................................................................... 6

2.1.1. Karakteristik Neutrofil ............................................................................... 6

2.1.2. Granulopoiesis .......................................................................................... 8

2.1.3. Aktivasi Neutrofil ...................................................................................... 10

2.2. Kubis .................................................................................................................. 12

2.2.1. Definisi ......................................................................................................... 12

2.2.2. Taksonomi .................................................................................................... 13

2.2.3. Morfologi ...................................................................................................... 14

2.2.4. Kandungan kimia Kubis ............................................................................ 15

2.2.5. Manfaat Kubis ........................................................................................... 21

2.3. Salmonella Typhi ............................................................................................... 21

2.3.1. Taksonomi .................................................................................................... 21

2.3.2. Morfologi ...................................................................................................... 22

2.3.3. Patogenesis Salmonella typhi ...................................................................... 23

2.4. Faktor yang Mempengaruhi Jumlah Neutrofil ............................................... 27

2.4.1. Neutropenia ................................................................................................. 27

2.4.2. Neutrofilia .................................................................................................... 28

2.4.3. Kegagalan Sumsum Tulang ........................................................................ 29

2.4.4. Infeksi Virus dan Bakteri ........................................................................... 29

2.4.5. Splenomegali .............................................................................................. 30

2.4.6. Perdarahan dan Hemolisis Akut .................................................................. 30

2.5. Mekanisme Kerja Neutrofil pada Infeksi Salmonella Typhi ......................... 30
2.6. Mekanisme Kerja Jus Kubis terhadap Jumlah Neutrofil pada Salmonella Typhi ................................................................. 33

2.7. Tikus Jantan Galur Wistar ...................................................... 34

2.8. Kerangka Teori ........................................................................ 36

2.9. Kerangka Konsep ................................................................. 37

2.10. Hipotesis ................................................................................. 37

BAB III METODE PENELITIAN .................................................. 38

3.1. Jenis Penelitian dan Rancangan Penelitian ............................... 38

3.2. Variabel Penelitian dan Definisi Operasional ............................. 38

3.2.1. Variabel Penelitian ............................................................. 38

3.2.2. Definisi Operasional ............................................................ 38

3.3. Populasi dan Sampel .................................................................. 39

3.3.1. Populasi Target ................................................................... 39

3.3.2. Populasi Terjangkau ............................................................ 39

3.3.3. Sampel Penelitian ............................................................... 39

3.4. Instrumen Penelitian ............................................................... 41

3.4.1. Instrumen Penelitian ........................................................... 41

3.4.2. Bahan yang digunakan dalam penelitian adalah .................... 42

3.5. Cara Penelitian ......................................................................... 42

3.5.1. Persiapan Hewan Coba ......................................................... 42

3.5.2. Persiapan Bahan Uji ............................................................. 43

3.5.3. Pemberian Perlakuan ............................................................. 44

3.5.4. Cara Pengumpulan Data ......................................................... 45
3.6. Alur Penelitian.................................................................46
3.7. Tempat dan Waktu ..........................................................47
3.8. Analisis Hasil ......................................................................47

BAB IV   HASIL PENELITIAN DAN PEMBAHASAN ....................... 48

4.1. Hasil penelitian..................................................................48
4.2. Pembahasan .......................................................................53

BAB V    KESIMPULAN DAN SARAN ........................................ 57

5.1. Kesimpulan........................................................................57
5.2. Saran ................................................................................58
