DAFTAR ISI

HALAMAN JUDUL ...........................................................................................................i
HALAMAN PENGESEHAN ..........................................................................................ii
SURAT PERNYATAAN KEASLIAN ..........................................................................iii
PRAKATA ....................................................................................................................iv
DAFTAR ISI ...............................................................................................................vi
DAFTAR TABEL .........................................................................................................viii
DAFTAR GAMBAR ....................................................................................................ix
DAFTAR LAMPIRAN ...................................................................................................x
INTISARI ....................................................................................................................xi
ABSTRACT .................................................................................................................xii

BAB I PENDAHULUAN ...............................................................................................1
  A. Latar belakang ........................................................................................................1
  B. Rumusan masalah ..................................................................................................3
  C. Tujuan penelitian ....................................................................................................3
  D. Manfaat penelitian ................................................................................................3

BAB II TINJAUAN PUSTAKA ......................................................................................5
  A. Landasan teori ........................................................................................................5
    1. Komposit .............................................................................................................5
    2. Mekanisme polimerisasi resin komposit ............................................................13
    3. Mekanisme penyerapan air pada resin komposit ...............................................14
    4. Kekerasan resin komposit ..................................................................................15
  B. Kerangka teori .....................................................................................................18
  C. Kerangka konsep .................................................................................................19
  D. Hipotesa ...............................................................................................................19

BAB III METODE PENELITIAN ...............................................................................20
  A. Jenis dan Rancangan Penelitian .........................................................................20
  B. Variabel dan Definisi Operasional .....................................................................20
    1. Variabel ..............................................................................................................20
    2. Definisi operasional ..........................................................................................21
  C. Besar dan Kriteria Sampel ..................................................................................22
  D. Instrumen dan Bahan Penelitian .......................................................................23
    1. Instrumen Pnelitian ............................................................................................23
    2. Bahan Penelitian ...............................................................................................23
  E. Cara penelitian .....................................................................................................24
    1. Pembuatan Saliva Buatan pada Laboratorium Biologi UNNES ..................24
    2. Pembuatan Sampel ............................................................................................24
    3. Perendaman Resin Komposit dalam Saliva Buatan ........................................26
    4. Pengukuran Kekerasan ...................................................................................26
  F. Tempat dan waktu ................................................................................................27
    1. Tempat ................................................................................................................27
      a. Laboratorium Mikrobiologi Fakultas Kedokteran Universitas Islam
         Sultan Agung Semarang .................................................................................27
      b. Laboratorium UPT Universitas Diponegoro Semarang .........................27
2. Waktu ................................................................. 28
G. Analisa dan hasil ................................................... 28
H. Alur penelitian ......................................................... 29

BAB IV HASIL PENELITIAN DAN PEMBAHASAN .................. 30
A. Hasil penelitian ........................................................ 30
B. Pembahasan ........................................................... 33

BAB V KESIMPULAN DAN SARAN .................................. 37
A. Kesimpulan .............................................................. 37
B. Saran .................................................................. 37

DAFTAR PUSTAKA .......................................................... 38

LAMPIRAN .................................................................. 40
DAFTAR TABEL

Tabel 4.1 Rata-rata hasil penurunan kekerasan..................................................30
Tabel 4.2 Uji Normalitas dengan Saphiro-Wilk dan Uji Homogenitas..............32
Tabel 4.3 Hasil Uji One Way Anova .................................................................33
Tabel 4.4 Hasil Uji Post Hoc LSD .................................................................33
DAFTAR GAMBAR

Gambar 2.1 Bis-GMA.................................................................6
Gambar 2.2 Berbagai ukuran filler yang digabungkan dalam resin komposit dan
nama klasifikasinya..............................................................7
Gambar 2.3 Struktur resin komposit.............................................8
Gambar 2.4 Struktur kimia bahan pengikat.....................................8
Gambar 2.5 Uji kekerasan alat vickers.........................................17
Gambar 3.1 Cetakan logam stainless steel.....................................20
DAFTAR LAMPIRAN

Lampiran 1 Hasil analisa data .................................................................40
Lampiran 2 Gambar cetakan resin komposit ...........................................45
Lampiran 3 Gambar tablet resin komposit diameter 8mm ketebalan 2mm ......45
Lampiran 4 Gambar resin komposit mikrohibrid dan nanohibrid. .................45
Lampiran 5 Gambar penelitian saat pembuatan specimen.........................46
Lampiran 6 Gambar penelitian perendaman resin komposit dalam saliva buatan yang akan di inkubator .................................................................46
Lampiran 7 Gambar penelitian proses indentasi kekerasan resin komposit. ....47
Lampiran 8 Gambar penelitian hasil indentasi pada *Micro Vickers Hardness Machine* ..........................................................47
Lampiran 9 *Ethical clearance* ...................................................................48
Lampiran 10 Surat Keterangan Laboratorium Mikrobiologi FK Unissula........49
